

EcoDamper System

Keep the Cold Air Out, and the Cool Look In!

Mechanical Venting of Fireplaces

- *Eliminates the need for glass doors*
- *Low profile*
- *Conserves energy*
- *Built to last*

*MFD - Mechanical
Fireplace Damper*

EcoDamper System

The environmentally friendly ENERVEX EcoDamper System is the first completely automated draft and damper system for use with gas fireplaces. The EcoDamper System quietly manages a perfect draft and prevents excess heat from escaping through the chimney when the fireplace is not in use. It eliminates the need for glass doors, opening up many new design options while allowing for a larger view area of the fire and a more natural look.

The system consists of the RS Chimney Fan, the Mechanical Fireplace Damper (MFD) and the ADC100 Control.

① RS Chimney Fan

Made of high quality, recycled cast aluminum, RS Chimney Fans maintain the perfect draft. The fan features a whisper quiet, enclosed direct drive variable speed motor.

② Mechanical Fireplace Damper (MFD)

The MFD is a unique automated fireplace damper which prevents excess heat from escaping through the chimney when the fireplace is not in use. The ultra low profile MFD comes equipped with an actuator that is interlocked to the ADC100, so it only opens when the fireplace is in use and draft is proven.

③ ADC100 Control

The ADC100 Control, for gas fireplaces, features a draft switch that shuts the appliance off when there is not enough draft, protecting your family from dangerous flue gasses. The control also features an integrated damper relay and interlocks up to two fireplaces. This control can be discreetly hidden behind an access panel or inside a cabinet.

Warranty

Two year factory warranty on all components. Ten year warranty against corrosion perforation on the RS Chimney Fan.

Contact ENERVEX

Contact us now for assistance in designing the fireplace of your dreams. We can help you decide what size fan to use and provide a solution for keeping your fireplace venting problem-free for many, many years to come.

The RS Chimney Fan - manufactured for more than 50 years

ENERVEX cares about the environment, so only the best materials and components are used, and we use recycled materials whenever safe and possible.
